

Each line is an example of newsprint magnified at the given power. After you print this **READING CHART**, read it at a distance of 10 to 15 inches from your eyes. Whatever line you read comfortably is the magnification you need for a magnifier. The magnification power is listed to the right.

Reading 10X/40D

Requires 8X/32D

Adequate 6X/24D

Lighting and 5X/20D

Magnification. 4X/16D

A magnifier should 3X/12D

Allow you to read your mail. 2X/8D

This print is similar to small headlines. 1.5X/6D

Congratulations! You are now reading small print.
